

Figure 1: A vertical cross-section diagram of a road structure. The diagram shows three distinct layers labeled 1, 2, and 3 from bottom to top. Layer 1 is the base, layer 2 is the subgrade, and layer 3 is the pavement. The total thickness of the pavement (layer 3) is 4.00. The subgrade (layer 2) has a thickness of 3.35. The base (layer 1) has a thickness of 2.85. The total thickness of the base and subgrade is 6.20. The diagram also shows the elevation of the top of the pavement (NE+4.00) and the elevation of the subgrade (NE+0.00). The elevation of the base is NE-3.35. The diagram is a technical drawing with dimensions and labels.
